I fully support Satalite radio especially XM radio. I value the traffic and weather since it is 24/7 and comercial free. When I need to make last minute traffic decisions, XM is there for me. The quality of the music and stations is crystal clear and has strong reception wherever I go across the country, same stations so when I leave California on a trip I don't have to worry about finding the stations I would like. The same stations are always there for me. I also pay for the service and I believe it is breaking the bill of rights to remove my right to pay for and listen to XM Radio. LET THE PEOPLE CHOOSE WHAT THEY WANT TO LISTEN TOO AND HOW. I am sorry millions have chosen the higher quality XM satalite radio over AM/FM radio. Satalite radio is the way of the future. LET IT HAPPEN DON'T TAKE AWAY OUR RIGHTS... XM's traffic and weather has trully helped me to make decisions on freeways and clothes when I would have had to wait for traffic reports every 15 min. By then it is too late. It is my choice to listen to what I want not the NAB. what is becoming of this country. Whats next the music we buy in stores? XM has my support...
